SUMMARY

With 10 years of experience in technology, **I specialize in designing solutions that optimize processes and enhance user experience.** What I enjoy most about my work is seeing how the solutions I design solve everyday problems and create a positive impact on people. I am motivated by how a well-designed screen, an intuitive flow, or even a clear email can completely transform an operation.

CURRENTLY

Product designer | Mercado Libre
From March 2023

- Design solutions to optimize logistics within the Meli network, focusing on continuous improvement in the shipping process.
- Collaborate with cross-functional teams to minimize operational friction and reduce business costs.

Key Achievement: Reduced package reinduction time, improving operational efficiency.

EXPERIENCE

Design Ops & Product Designer | albo
January 2019 - February 2023

- As the first Product Designer in the team, I established standards for interface construction and user research methodologies.
- Co-founded the Design Ops team, ensuring designers had the necessary resources and efficient processes.

Key Achievements:

- Reduced screen creation time by 25% through the implementation of a Design System.
- Redesigned the app structure to integrate new functionalities.

UI/UX Designer | Accenture
February 2019 - December 2019

- Designed and optimized the information architecture and navigation flow for a cutting-edge financial platform.
- Implemented usability improvements to facilitate complex tasks and enhance the user experience.

Key Achievement: Launched the first F&F version for account creation.

UI Specialist | Bambú Mobile
October 2015 - February 2019

- Designed solutions for multiple products across various industries, ensuring optimized user experiences.
- Contributed to the continuous improvement of design processes within the consulting firm.

Key Achievement: Launched new platforms with added value.
